

Product Name : beta-Nicotyrine

Synonyms : Nicotyrine; alpha-Nicotyrine

Cat No. : M27260

CAS Number : 487-19-4

Molecular Formula : C10H10N2

Formula Weight : 158.2

Chemical Name : —

Description : beta-Nicotyrine is a tobacco alkaloids Metabolite in the liver.

Pathway : Others

Target : Other Targets

Receptor : —

Solubility : —

SMILES : Cn1cccc1-c1cccnc1

Storage : (-20°C)

Stability : ≥ 2 years
